

Massab Farooq

Python/Django Engineer · Production business systems · Media background

Jhang, Pakistan (UTC+5) · open to remote roles · musabfarouq555@gmail.com · +92 333 673 5267
massabl.github.io · github.com/massabl · linkedin.com/in/musabfarouq

SUMMARY

Python/Django engineer who designs, builds and supports production web systems for real operations: a school ERP (admissions, results, fees, double-entry finance, HR) and a hospital system (OPD, laboratory, imaging, pharmacy, billing), each with an automated test suite, plus a restaurant and club point of sale. Shipped Claude API features in the school ERP. About 18 years in journalism and field reporting with ARY News, now applying that newsroom experience to AI-assisted tools with human editorial approval. HarvardX CS50 and Google certified.

TECHNICAL SKILLS

Production use	Python, Django, server-rendered HTML/CSS/JavaScript, SQLite and MySQL, ReportLab PDF generation, role-based access control, Git and GitHub, cloud deployment and maintenance
Working knowledge	Claude API integration, Django REST Framework, pandas, openpyxl, Bootstrap, progressive web apps
Coursework	Data analysis and business intelligence, R, cybersecurity fundamentals, SQL databases
Domain	Newsroom workflows and editorial standards, school administration, hospital OPD and laboratory workflows, restaurant operations

SELECTED PROJECTS

MySchool ERP — school and college management system Python, Django 5, SQLite / MySQL, ReportLab, Claude API	In production · 36 automated tests
- Admissions with online applications and entrance test; exams with real-time PDF result cards and leaving certificates. - Fees, chart of accounts, double-entry vouchers, trial balance and profit and loss; HR and payroll; parents' web app. - Claude-powered school assistant chatbot and a fee-reminder assistant that drafts messages for staff to review and send. - Feature plans switch modules per institution; offline installs verified with a signed licence key; 277 generated A4 worksheets.	
Hospital & Clinic System — private hospital Python, Django 5, Django REST Framework, SQLite (PostgreSQL-ready)	In production · 68 automated tests
- Patient tokens, OPD records and letterhead prescriptions; laboratory orders and results; X-ray, MRI and ultrasound tracking. - Admissions, surgeries and nursing; pharmacy point of sale with stock; invoices, refunds, cash reconciliation and day-end audit snapshots. - Drug-interaction, allergy and contraindication checks as small APIs, with every clinical override logged. - Role-based access for five staff roles, doctors and patients, covered by an access-control test suite.	
Restaurant & Club POS — Model Town Club, Lahore Python, Django, JavaScript, SQLite	In production
- Touch POS with tables, holds and cash, card or member-account payment; kitchen display with per-ticket timers. - Member portal for phone ordering; 80 mm thermal receipts; admin screens for menu, tables and staff.	

EXPERIENCE

- Quaprit Technologies Inc. — Founder and software developer

Jhang, Pakistan

 - Design, build, deploy and support Django systems for a school, a private hospital and a members’ club.
 - Gather requirements directly from non-technical staff; own data modelling, printed documents, permissions, tests and maintenance.
- ARY News — Journalism and field reporting

About 18 years

 - Field reporting and newsroom work: gathering facts under deadline, checking sources and working within editorial approval.
- Voice of Jhang — Founder, digital news channel

133K+ followers

 - Built and run a local digital news channel covering Jhang and the surrounding region.
